

American states. If they go in company armed, they violate the neutrality laws, and are liable to arrest and punishment. At the same time, their grant, which they profess to receive from the Mosquito King, is exploded, and they are informed that the right of eminent domain in any part of the territory in question is lodged in some one of its civilized States.

That Col. Kinney is somewhat mistaken in his representation to the Secretary of the character of the Expedition, would appear from the following letter, over his own signature published in the *Montgomery (Ala.) Journal* (From the *Montgomery (Ala.) Journal*, Jan. 30, 1858.)

"The *Enterprise* is a letter from Col. Kinney, who is engaged to lead a Central American expedition, to a gentleman in this vicinity has been handed us for publication. It may interest to the adventurous and enterprising:

WASHINGTON, Jan. 14, 1858.

Sir: I have yours of the 10th. Every day I see in the American press the Government to be reformed, and to take special capacity, although it be required, for two months, (as the militia of any country), will be able to do so, and to be sure, and in proportion to their rank.

Should you be able to conduct a number of men from your country, you will be entitled to a position as officer in proportion to number.

And from del Norte (late Greytown) will be the place of debarkation. I shall leave for port by the first of February next.

Yours truly, J. KENNEDY.

Here is fully disclosed the military character of the enterprise, together with the intention to establish an independent Government. If authentic, (and we presume no one doubts this point), the Administration is now bound to take notice of it.

We should like to hear from the *Intelligencer* and other respectable journals, which at the time since commended this enterprise, they think now.

A BEAUTIFUL EXHIBITION IN WASHINGTON

On Thursday, the 8th of February, the annual Exhibition of the Metropolitan Mechanical Institute was formally opened in the hall of the Smithsonian Institution, in the presence of a very large concourse of persons. The address delivered on the occasion, by Joseph H. Bradley, Esq., was a most judicious, clear, eloquent, and impressively delivered. The exhibition is one of great interest. The products of the industry, skill, and taste of the American people are well represented, and the various exhibitions are adorned with thousands of offerings of the most interesting and curious, while the machinery in operation is of itself a subject worthy of prolonged and full examination.

Multitudes daily and nightly crowd the hall. Many families, delighted with the scene, sit upon the seats of the orchestra, the pianos, the melodeons, the organs, and at times the very voluntary vocalists. While we congratulate the Metropolitan Institute and our city at the upon the triumphant success of this Exhibition,

We would suggest to our readers abroad that it is not probable that a season will soon occur, in which a visit to Washington will be so agreeable and profitable as during the continuance of this display. From the 20th of February until the 8th or 10th of March we presume, be the most satisfactory time for such a visit.

FROM THE PACIFIC.

The latest intelligence from the mines of California is favorable. The North Star has a million and a quarter of gold on freighters. The election for Senator was fixed for 17th ult. Philip L. Edmonds, a Nebraska man, of Milwaukee, was elected.

man, and of Missouri, was the Whig candidate against Gwin. The Broderick men, having no hope of their own man, will be content if they can defeat Mr. Gwin. The political generally of a Pro-Slavery stripe, seem to do things their own way. The People are the account. Had the Whigs adopted the

BURNING IN EFFIGY.

The Know Nothings, in various localities New York, are displaying their sublime Americanism by burning in effigy those members of the Assembly who, in disobedience to the Convention, voted for Mr. Seward. A correspondent of the *New York Herald*, writing from Albany, February 9th, says:

"Burning members in effigy continue, today morning, the Hon. Mr. Littlejohn, of the House of Commons, was distinguished in Greenbush, opposite this. Those are the constituents of the latter man."

SIMON CAMERON NOMINATED FOR SENATE

The nomination of Simon Cameron for United States Senator, by the Know No Caucus of the Pennsylvania Legislature, is a very singular one. He is one of the body guard of slavery—a man who, while in the Senate before, was as uniformly opposed to the Slave Power as Augustus Cesar. I suppose his nomination is to be accounted as an evidence of the Anti-Slavery class of the Order.

We do not often print long obituaries, but, by request of some Southern friends insert the following notice of a remarkable man—*Ed. Era.*

A REMARKABLE MAN.

Died at Mechanicsville, Montgomery Co. Md., on the 27th ult., WASHINGTON HOOD, a respectable and well-known colored man, the 48th year of his age. His disease was typhoid fever, which has been particularly bad, during the present season, among colored people in this healthy region, and under his powerful frame sank, after a week's illness.

The deceased was a remarkable man. He had worked in the village, at the trade of blacksmith, for thirty years; and, though dark in color as the iron he knew so well to handle and temper, was much respected by his employers, and by all who knew him. He was faithful, industrious, and temperate.

But, beyond these not uncommon traits, there are certain qualities that awaken in the reader an unusual degree of interest in his character. He is one among persons of high intelligence and high character. From several individuals of this type, the writer of this article has gathered such expressions as the following: "Watson Hodge is certainly a natural genius, a man of clear, strong mind, and, withal, a gentleman." He possessed a just self-reliance, amounting to truthfulness, and was as free from any trace of vanity as of selfishness and of severity. He frequently counseled his colored friends to be strictly obedient to the laws, and always set them a good example in his own person.

There was something of the heroic in him, as is shown in the following incident. It must be mentioned, that he was a large, tall, and well proportioned, and possessed extraordinary physical power. One day, busily engaged at his labors in the smithy, a man rode up to the door, and ordered him in an imperious manner, to hasten up to the door a printed advertisement. Hodge, with usual respectful politeness, was going to comply, when he discovered that it was an advertisement offering a reward for a fugitive. He refused then to touch the paper. The giving Hodge the benefit of some rough
